

Prof. Pedro Lozano, FRSC

Professor Pedro Lozano received his BSc/MSc in Sciences (Chemistry) from the University of Murcia in June 1984, and his PhD in Sciences (Chemistry) from the University of Murcia in July 1988. Between, 1990 and 1991, he spent two years of post-doctoral formation at the Centre de Bioingénierie Gilbert Durand, Toulouse (France). In 1993, he returned to the Faculty of Chemistry at the University of Murcia (Spain) as Lecturer in Biochemistry and Molecular Biology, being finally promoted to Full Professor in 2004. Between 1996-2014, he was Assistant Dean of the Faculty of Chemistry and coordinator of the Biochemistry Degree at the University of Murcia, and since 2014 he is the Dean of the same Faculty. Prof. Lozano has also been Visiting Professor at the Universities of Rennes-France (2002) and Bordeaux-France (2013). His research activity has always been related with enzyme technology under non-conventional media, being focused on the use of biocatalysts ionic liquids and supercritical fluids for developing green chemical processes. He is the author of more than 140 publications (i.e. research papers, reviews, book chapters, etc), and more than 200 scientific Congress contributions. Prof Lozano was obtained the 7th IQS-European Award on Enzyme Technology (2003), and the Fellow position at the Royal Society of Chemistry (2017). Prof. Lozano is regional editor of the journal *Current Green Chemistry*, as well as member of the advisory board of *Molecules* and *Mini-Reviews in Organic Chemistry* journals.
